

## Section 3 — Airspace & Charts

### NAS Overview

- Controlled airspace: B, C, D, E; Uncontrolled: G.
- Special Use: Restricted, Prohibited, MOA, Warning, Alert.
- Always check TFRs & NOTAMs before flight.

### Sectional Symbols

- Magenta vs blue airports; tower/obstacle depictions and lighting.
- MEF and terrain shading; grid numbers = MSL ceilings.
- Practice: identify class, floor/ceiling, and obstacles at a sample point.

### LAANC & Facility Maps

- Interpret UAS Facility Map grid ceilings (ft AGL).
- Submit LAANC with mission parameters; save authorization text.
- 'Further coordination' may require earlier submission or reduced altitude.
