

Remote ID — Troubleshooting Card (Section 8 Lesson 3)

Common Errors → Fixes

Error	Fix
RID fail in app	Reboot aircraft/module; check firmware; re-enter module serial.
Module not broadcasting	Charge module; check connection/orientation; wait for GPS lock.
Registration mismatch	Update DroneZone record; verify serials; replace unreadable label.

Log It

- Record RID status on preflight and keep proof of registration.
- Ground aircraft if RID cannot be verified.
